Vol. III, No. 8

AUG 27 1959

August 1959

JULY BASE PRICE \$4.01

Dairy farmers will receive a base price of \$4.01 for July 1959 deliveries of Grade A base milk to handlers under the South Bend-LaPorte-Elkhart, Indiana, milk order. The base price is based upon a butterfat test of 3.5 percent, and will be adjusted by a differential of 7 cents for each one tenth percent that tests vary above or below the 3.5 percent standard. This price is 23 cents higher than the June base price, and 52 cents higher than the base price of a year ago.

JULY EXCESS PRICE \$2.93

July 1959 deliveries of Grade A excess milk to handlers under the South Bend-LaPorte-Elkhart, Indiana, milk order will be paid for at the rate of \$2.93 per hundredweight for 3.5 percent milk, and adjusted by the same differential of 7 cents as is used for base milk. These minimum prices are subject to a 3 cent per hundredweight marketing service deduction, together with the authorized hauling charge. For comparative purposes, a uniform price of \$3.86 per hundredweight was computed. This price is 24 cents higher than the June 1959 computed uniform price and 46 cents higher than the computed uniform price of July 1958.

PRODUCER RECEIPTS

Production has taken quite a drop in July on a daily basis, as compared with June. One of the reasons for this decrease is the loss of about 55 producers on the market. The decrease in number of producers follows a pattern throughout most the country of can producers converting to bulk tank or going off the market, and in this instance, they have left the market. Handlers do not realize the full benefit of bulk tank producers until all their producers are bulk tank, and they can eliminate the receiving room and the can washer. A few handlers have changed to all bulk tank producers, and the can shippers have had to find a market elsewhere.

CLASS I SALES

The Class I sales have remained steady for the month of July, as compared with June, but show an increase of 54 percent over a year ago. For the month of August 1959, we will be able to compare August sales with a year ago on a comparable basis, because of one full year's statistics under the expanded marketing area.

CLASS I PRICE

The Class I price for the August 1959 delivery period will be \$4.25 per hundredweight for 3.5 percent milk. This price was computed by adding \$1.30 per hundredweight to the average price of the 12 condenseries in July 1959 (\$2.93) and adding the supply-demand adjustment of 2 cents. The supply-demand adjustment for the September 1959 delivery period will be a plus 8 cents.
